## SUMMARY

---

Remote Software Engineer working in open source domain. Experienced in engineering (9 years), technical support (2.5 years), and user-facing roles (4 years); now focusing on getting into the depths of Go & Kubernetes. I have been working remotely since October 2015.

## SKILLS

---

**Primary**            Go, Linux, Kubernetes, Virtualization  
**Secondary**        Bazel, Python, Ansible, Terraform, LaTeX

## I AM PROUD OF

---

- [End-to-end work](#) on hook sidecar ConfigMap feature on an entirely new code base
- [odo dev](#), concurrency ([1](#), [2](#), [3](#)) to improve `odo logs` performance, lead [documentation effort](#). Created 12 videos for enablement of Technical Support, opened 18 bugs in the process, and received an award for the same
- Presented [CentOS Container Pipeline Service](#) in conferences and architected its v2 based on OpenShift 3

## EXPERIENCE

---

**Senior Software Engineer, Red Hat** **Oct 2015 - Present**

- Developer on the [KubeVirt](#) team *Dec 2022 - Present*
  - End-to-end implementation and delivery for [ConfigMap support in hook sidecar](#)
  - Use [Operator framework](#) to build and manage Kubernetes Operators
  - Stack: Go, [controller runtime](#), [operator-sdk](#)
- Developer and Team Lead for the [odo project](#) *Apr 2019 - Dec 2022*
  - Go CLI to deploy apps on k8s; extensively used concurrency primitives.
  - Team Lead between Nov 2020 - Dec 2021
  - Lead the documentation effort: ([website](#))
  - Lead the effort to educate support team about the tooling.
  - Stack: Go, [spf13/cobra](#) (CLI framework); goroutines, mutexes, `sync/atomic` (concurrency)
- Developer and Architect for [CentOS Container Pipeline](#) project *Mar 2016 - Apr 2019*
  - Service written in Python and deployed on OpenShift using Ansible
  - Lead the architectural effort to move to OpenShift
  - Stack: Python; Ansible & OpenShift (deployment); Jenkins Pipelines (build orchestration), beanstalkd (message queue); Prometheus & Grafana (monitoring)

**DevOps Engineer, Ishi Systems** **Jul 2015 - Oct 2015**

- Evaluate Apache Mesos on AWS using Terraform for application deployment
- Stack: Apache Mesos, [Marathon](#), [Chronos](#), AWS, Terraform, Ansible

**Software Engineer, Aubergine** **Dec 2014 - Jul 2015**

- Backend developer for the [Cubii mobile app](#)
- Design, develop and deploy the APIs
- Stack: [Django Rest Framework](#), Celery, AWS

**Associate Software Engineer, Red Hat** **Jun 2014 - Nov 2014**

- Worked on the ISV Certification team, and developed Dockerfile linter in Python

#### **Associate Technical Support Engineer, Red Hat**

**Apr 2012- Jun 2014**

- Technical support cases for Linux, Virtualization and OpenStack platforms
- Front-line engineer, worked on call support

#### **Linux Administrator, Global SMS Networks**

**Dec 2011 - Mar 2012**

- Setup firewall rules using iptables; admin for Web, FTP, Mail servers.

#### **IT Engineer, CMC Ltd.**

**Aug 2010 - Aug 2011**

- Setup Oracle 10 rg2 on RHEL5.5; requirement gathering from the client.

### **EDUCATION**

---

**Bachelor of Engineering**, Information Technology  
Sardar Patel University, Anand

2006 - 2010

### **AWARDS & CERTIFICATIONS**

---

#### **Red Hat Developer Impact Award**

**Dec 2019**

Awarded for using the tool from a user's perspective, creating learning material for Technical Support team, and opening numerous bugs in the process

#### **Certified Kubernetes Administrator**

**Nov 2020 - Nov 2023**

#### **Certified Kubernetes Application Developer**

**Nov 2020 - Nov 2023**

### **CONFERENCE TALKS**

---

- [DevConf.CZ 2018](#) at Brno, Czech Republic
- [CentOS Dojo 2019](#) at Brussels, Belgium
- [DevConf.CZ 2019](#) at Brno, Czech Republic

### **COMMUNITY & MENTORING**

---

- Lead of [Kubernetes](#) and [Docker](#) meetup chapters in Ahmedabad
- Mentored undergraduate students in Linux & Python (references available on request)
